Course Aims

CFS Integrated Foundation Year

This course introduces you to the fundamentals of filmmaking, post production & VFX, screenwriting and screen acting. It will help the development of your creative, critical and craft skills in preparation for progression to the accelerated BA (Hons) programme and integrates professional practice through collaboration on BA and MA graduation films.

BA(Hons) Post-Production & VFX

BA (Hons) Post Production & VFX at Central Film School is an intense, accelerated two-year course taught by working industry professionals with extensive knowledge and experience. The intention of the course is to provide an immersive educational experience that ensures that students are confident and capable practitioners who are conversant with industry expectations and standards and ready to work collaboratively with a diverse workforce.

Our practical projects mirror the film industry's workflow and creative environments. You will develop your creative and technical skills together with your contextual knowledge. You will engage with the latest digital technologies to develop your technical and craft skills and further inspire your creativity and ambition. You will collaborate extensively with an emphasis on practical and on-set assessments that will build your skills and confidence to enter the industry after graduation. During your studies you will have opportunities to interact with film industry performers and practitioners at all levels of their careers through our Professional Perspective panels and visiting lecturer programmes.

Our graduates will be equipped to make positive and impactful change when entering industry, and ready to work as an agent of change with a lifelong commitment to personal creative responsibility, working equitably with their socially and culturally diverse fellow practitioners in a period of monumental challenge.

Course specific employability skills

CFS Integrated Foundation Year

As you progress through the course you will develop an understanding of the art and craft of filmmaking. Both transferable and employability skills will be embedded into your learning through both structured collaborative practice and reflective thinking, and the progressive execution of your technical expertise.

- **Collaboration and Team Working**

Working with others in a respectful, positive, organised and collaborative manner.

- **Technical skills**

You will gain practical experience with industry-standard tools, refining your ability to utilise digital platforms and software.

- **Problem Solving and Experimentation**

Logical reasoning, experimentation and creativity, including the ability to relate these to practical challenges.

- **Health and Safety**

Developing an awareness of necessary health and safety guidelines.

- **Personal Development**

Defining priorities, managing your time effectively, developing an understanding of personal strengths and weaknesses, and how to respond to and give constructive criticism and feedback.

- **Imagination and Creativity**

Developing the ability and confidence to use creative solutions for film production processes.

- **Organisational**

Time management, effective processes and good communication.

- **Research**

Managing and evaluating from a variety of sources. Fully understanding a brief and delivering a presentation.

BA(Hons) Post-Production & VFX

As you progress through the BA Post Production & VFX at Central Film School you will develop an understanding of the art and craft of post production and the associated field of visual effects (VFX). Both transferable and employability skills will be embedded into your learning

through structured collaborative practice and reflective thinking, and the progressive execution of your technical expertise. The School also encourages you to think about future career destinations and how you might best prepare for the world of work in the Level 6 module (The Professional Post Producer) where you produce showreel materials that will promote your skills and services to an audience of potential employers.

The course will offer you an opportunity to practice the following skills that can be used in professional settings in film and creative industries, as well as in academia and beyond:

Industry & Business Knowledge: You will develop an ability to recognise and apply relevant terminologies, technologies and processes to your creative practice or evaluation of others' work.

Critical Thinking & Analysis: You will develop an ability to look below the surface of screen-based production, make connections and reflect on different social and creative perspectives. Through this process, you will build a more profound understanding not only of your specific creative field, but also of values and attitudes in contemporary global societies that influence what you see on the screen.

Technical Skills: You will develop the ability to apply established and emerging technologies in an effective and ethical manner, ensuring responsible and informed creative decision-making. You will gain practical experience with industry-standard tools, refining your ability to utilise digital platforms and software. You will understand and apply structured workflows to support creative decision-making. You will develop the capacity to troubleshoot and resolve technical challenges.

Expanded Worldview: You will appreciate a range of diverse creative practices and modes of expression. You will also develop social and political sensitivity, especially regarding representation.

Ethical and Legal Responsibilities: You will progress your understanding of how to work professionally within industry-standard ethical and legal frameworks.

Health and Safety: You will enhance your awareness of health and safety guidelines and apply them in professional settings. Your awareness will include matters relating to mental well-being, sustainability, and safe working environments.

Problem Solving and Innovation: You will grow your capability to logically and critically evaluate the currently available screen performance practices and progress your creativity towards innovation by applying conceptual models to practical challenges.

Imagination and Creativity: You will gain the opportunity to experience exploration of individual and ensemble creativity, practically. You will develop understanding of processes in order to stimulate creativity to develop your craft.

Collaboration and Team Working: You will develop a positive attitude when working with others in a respectful, organised and collaborative manner. Your ability to forge productive relationships with others and to understand the essential elements of how creativity is fostered in diverse team environments.

Organisation: You will advance your project and time management skills.

Entrepreneurial skills: You will learn to identify and take advantage of professional and personal opportunities. You will develop your business awareness and understand what is required working within the creative arts. You will develop practical knowledge in important areas such as marketing and branding for the modern-day professional and gain knowledge on successful practices relevant to the industry today

Communication skills: You will practice an ability to articulate your ideas in writing, speech and practice in a coherent and clear manner that can be understood by non-specialist audiences.

Personal Development: You will define your priorities, manage your time effectively, develop an understanding of personal strengths and weaknesses and find ways of responding to constructive criticism and feedback.

In addition to its subject focus on your creative discipline the course will prepare you for other types of creative industry careers. All the above skills are transferable, which means that they can be adapted and deployed in a variety of fields and careers.

Career/future study opportunities

CFS Integrated Foundation Year

The BA Integrated Foundation course is designed to provide entry to the two-year fast-track BA (Hons) programmes at Central Film School.

This course gives you the opportunity to learn in a creative and inclusive studio environment – it will give you the confidence, production skills and portfolio of work required for entry onto our BA (Hons) Practical Filmmaking, BA (Hons) Post Production & VFX, BA (Hons) Screenwriting or BA (Hons) Acting for Screen.

We will introduce you to the fundamental production principles and transferable skills of film production. You'll explore the production process through creative projects and technical workshops, and develop core technical skills, digital practice, presentation and communication, as well as your critical thinking and writing. These core skills will inform a final group production project.

You'll have hands-on academic and technical support in excellent facilities. And when you leave the course you'll be equipped to get the most out of whichever degree you choose.

Further career opportunities/destinations include:

- Industry internships and trainee programmes
- Apprenticeships
- Skillset Training Schemes

Further study opportunities include:

- Central Film School, BA (Hons) Screenwriting
- Central Film School, BA (Hons) Post Production & VFX
- Central Film School, BA (Hons) Practical Filmmaking
- Central Film School, BA (Hons) Acting for Screen

Study within another institution

BA(Hons) Post-Production & VFX

The course will help you become an adaptive thinker, a creator and a supportive contributing team player joining the next generation of writers, performers, producers, directors, analysts, academics and project developers who shape the zeitgeist of contemporary film. Alongside the established career pathways, there are also a multitude of new opportunities for creatives in new media formats (eg Tik Tok) and the games industry.

Typical career destinations of our graduates include:

- Film, television and radio performance
- Branded and Web Content
- Music Video
- Advertising
- Marketing
- Teaching
- Talent Scouting and Development
- Film Exhibition and Distribution
- Sales Agency
- Sales Acquisition & Strategy
- Live Event Broadcast Production
- Research and Development
- Journalism

Further academic study:

- Postgraduate Practice & Research (MA, PhD, ProfDoc)
- PGCE (Teaching Programme)

Structure of Course Delivery

BA(Hons) Post-Production & VFX

Pedagogy

The BA programme is delivered within a suite of courses that provide training in filmmaking screenwriting and screen performance and introduces you to the fundamentals of screen-based technical practice.

The BA (Hons) Post Production & VFX delivers the curriculum using strategies that encourage independence, self-reliance and group co-operation. You are expected to take responsibility for your learning and encouraged to explore the uses of blended learning techniques when working with your peers.

Group work is a vital aspect of the degree as it reflects the collaborative nature of filmmaking and the creative environment in which performance takes place. Creative practice teaching delivered during the programme elucidates the nature of and interrelationship between core roles relating to performance and how they change in different environments. Modules are structured around regular group work which may take place solely between you and your peers on the course or students from different courses. This experience will allow you to become familiar with real-world practices during which you will share knowledge and develop an understanding of cooperation, negotiation, compromise, leadership and management and team hierarchies, as well as the sensitivity to manage equality, diversity and inclusion in preparation for your entry into industry.

Course Design

At Level 4, modules are designed to introduce you to the fundamental principles, practices and collaborative relationships governing practice of post production. Given that the post production cycle is established in the context of film and screen-based production practices, the first two modules enable students to become totally familiar with the personnel, production practices and ensemble creativity of screenwriters, actors and fellow production specialists that govern this field. At Level 5 you will gain a deeper understanding of the creative process, its wider contexts and develop your technical skills and specialisms. At Level 6 you will develop your technical skills in the context of a longer production. The skills that you will develop and practice are the consolidation of your creative practice and culmination of your study.

Teaching Sessions

Module teaching, learning and assessment take a variety of forms to offer an inclusive, safe and supportive learning environment for all students and enable multiple possibilities for constructive feedback so that you can fulfil your potential. These modules are led by practising professionals, academics and filmmakers who share their real-world film experience and are supported by a team of experienced technicians. Your learning experience is enriched by regular opportunities to listen and talk to visiting speakers through our Professional Perspectives Programme.

You will be taught by staff in a variety of ways:

Lectures: Some teaching will be delivered as 'traditional' lectures, for the conveying of complex ideas or for the clarifying of assessment and other course requirements.

Seminars: These are a chance for you to spend time with your tutor and peers investigating ideas and processes. It is a chance to work on your assessments and receive support from a variety of people and a chance to engage with ideas and develop your understanding in a safe and supportive environment.

Technical Inductions: Our technicians will enhance your skills in handling our camera, sound and lighting equipment.

Workshops: Workshops involve you developing specific craft skills and applying your learning to productions and assessment. They also facilitate your own personal, creative and professional development.

Professional Masterclasses: Your core learning is supplemented by a programme of guest speakers who deliver talks and masterclasses across a range of specialisms and professions.

Crits/Peer Learning: We have a wide variety of approaches to peer learning, including pitching/feedback sessions and crits, where you share work-in-progress and support each other in honing work for assessment and beyond. This activity helps you learn how to critique constructively and how to improve your work from reading others' approaches and acting on their feedback.

Individual Tutorials: Tutorials with tutors and course leaders allow you to really get to grips with your understanding of a module and/or an assignment as well as to discuss your progress and seek support in terms of time, project and personal management.

Virtual Learning Environment (VLE) and Online Learning: Modules may employ different forms of online learning to enhance your experience and add to the diverse ways of learning that you will experience on the course. Online spaces are used to provide a safe and supportive environment to help you stay engaged with work and peers across modules and between periods of teaching and assessment.

Module Structure:

Level 4

- Visual Storytelling
- Screen Studies
- Shooting for Post Production
- VFX Fundamentals 1

Level 5

- VFX Fundamentals 2
- Effects & Practices: Post Production for Audio & Video
- Finishing for Film and Broadcast

Level 6

- Collaborative Workflows
- The Professional Post-Producer
- Final Major Project

Course Assessment Strategy

CFS Integrated Foundation Year

Course Design

The foundations of a professional and collaborative sensibility will be laid in this foundation year of study that prepares you for the BA (Hons) two-year fast track degree. The focus of this foundation year is on laying the groundwork through collaborative project development to gain a deeper understanding of the visual storytelling process and its wider contexts. Your ability to forge productive relationships with others and to understand the essential elements of how creativity is fostered in team environments will support you and your ambitions in the next stage of your academic career and beyond.

The foundation year is structured with five modules over a two-term academic year. The first term commences with the Foundation in Screen Practice module which will provide an introduction to filmmaking techniques and equipment through technical induction sessions, workshops and supervised studio practice. The Screen Industries Research module will introduce you to research techniques and equip you with the study skills needed for academic success. In term two, Writing Short Scripts will introduce you to dramaturgy and screenwriting techniques. The Professional Practice module will acquaint you with professional film practice through working collaboratively in a Central Film School BA and/or MA graduation film shoot as an assistant to a specific production or post production department, such as Producing, Assistant Directing, Camera, Production Design, Sound, Editing or acting. You will be assessed on-set regarding your professional conduct and your understanding of the production expectations and technical requirements. Term 2 is the culmination of your foundation study where you collaboratively develop a short script and film on which you will fulfil the production role that you assisted in the Professional Practice module.

Module Structure

Term 1: Foundation in Screen Practice

Term 1: Screen Industries Research

Term 1: Writing Short Scripts

Term 2: Professional Practice

Term 2: Final Group Project

On the BA (Hons) two-year fast track degree you will begin to specialise in Practical Filmmaking, Post Production & VFX, Screenwriting or Acting for Screen and develop a deeper understanding of the importance and power of cinematic filmmaking and storytelling.

Module teaching, learning and assessment take a variety of forms, both to offer an inclusive, safe and supportive environment for you to learn in and to enable multiple possibilities for constructive feedback to allow you the opportunity to fulfil your potential. Module teaching is led by

both experienced specialist academics and practising filmmakers and performers and is supported by a team of technicians who facilitate the development of your skills with our filmmaking equipment and share their real-world experiences. This teaching and learning is enriched by regular opportunities to listen and talk to guest lecturers who are all active and successful in their field. You will be taught by staff in a variety of ways:

Lectures: Traditional lectures are used for the conveying of complex ideas or for the clarifying of assessments and other course requirements.

Seminars: These are a chance for you to spend time with your tutor and peers investigating ideas and processes. It is also an opportunity to work on your assessments and receive support from the broader academic community where you can engage with ideas and develop your understanding in a safe and supportive environment.

Individual Tutorials: Tutorials with tutors and course leaders allow you to really get to grips with your understanding of a module and/or an assignment, as well as to discuss your progress and seek support in terms of time, project and personal management.

Technical Inductions: Our technicians will enhance your skills in handling our camera, sound and lighting equipment.

Virtual Learning Environment (VLE) and Online Learning: Modules may employ different forms of online learning to enhance your experience and add to the diverse ways of learning that you will experience on the course. Online spaces are used to provide a safe and supportive environment to help you stay engaged with work and peers across modules and between periods of teaching and assessment.

Crits/Peer Learning: We have a wide variety of approaches to peer learning, including pitching/feedback sessions and crits, where you share work-in-progress and support each other in honing work for assessment and beyond. This activity helps you learn how to critique constructively and how to improve your work from reading others' approaches and acting on their feedback..

Professional Masterclasses: Your core learning is supplemented by a programme of guest speakers who deliver talks and masterclasses across a range of specialisms and professions.

Workshops: Workshops involve you developing specific craft skills and applying your learning to productions and assessment. They also facilitate your own personal, creative and professional development.

Learning Community: You will work on productions for the BA (Hons) and MA students that will develop your professional practice and extend your network within the school community.

BA(Hons) Post-Production & VFX

The purpose of assessment is to measure your progress and achievement throughout the course and to confirm that the Learning Outcomes for each module have been met. It is the method by which you receive summative feedback in order to help you develop your practice and performance.

Assessment is governed by the Assessment Regulations as detailed in Central Film School's Academic Framework. Information about it is available on the Central Film School website; details of links are provided in your Course Handbook.

Throughout the modules on all levels, at Central Film School a major assessment method is the on-set assessment of your role. This type of assessment focuses on process rather than outcome. It develops and assesses your core 'hard' skills (e.g. technical) and your 'soft' skills (e.g. professionalism), both vital for your entry into the industry.

Studying screen post production requires you to understand the collaborative nature of filmmaking as well as the interrelationship of a variety of skills and knowledge. We therefore use formative and summative feedback throughout the course. Learning Outcomes and Assessment Criteria, as outlined at the end of this document, relate to specific periods of growth and development during your course of study.

Formative assessment is concerned with progress, development and growth, and summative assessment measures achievement and accomplishment demonstrated at the end of each module.

Each module of study is assessed using the common assessment criteria of Central Film School. Feedback is delivered formatively both in advance of and following summative assessment.

The purpose of assessment is to provide you with:

- An active process that recognises and supports learning and achievement
- As an experience itself it contributes to the integration of learning and practice
- Feedback on progress which identifies strengths and recommendations for improvement
- Opportunities to present work, and articulate ideas and attitudes in a progressively professional manner

Evaluation and assessment provide the course team with:

- A means of offering you guidance in the evaluation of your progress
- A means of offering you advice and guidance on your work
- A means of monitoring and evaluating the course
- A basis for accreditation of modules
- A basis for progression from one level to the next

Each module will have specific requirements and these will be clearly briefed at the appropriate stages of the course. At these points, you will be issued with a Module Guide containing a summary of the briefs, elements of assessment, learning outcomes, assessment methods, marking scheme and the work required for assessment. Please thoroughly read the Module Guide so that you have an understanding of how the learning outcomes relate more specifically to the project work you will be completing. Ask questions if you are unsure of anything.

Regular seminars, scheduled tutorials and peer review opportunities, as well as bookable tutorials, provide formative feedback on work-in-progress against the learning outcomes and project deliverables. These staff and peer interactions offer you opportunities to ask questions, seek clarification and discuss and share significant findings, areas of research, methods employed and discoveries made.

Course Learning Outcomes

LO name	Level 4	Level 5	Level 6
1. Technical	Identify & apply ideas, creative elements, processes and techniques appropriate to a project	Demonstrate ideas, creative elements, processes and techniques appropriate to a project	Evaluate ideas, creative elements, processes and techniques appropriate to a project
2. Collaboration	Identify & apply constructive relationships and work effectively on a project	Demonstrate constructive relationships and work effectively in the conception and delivery of a team project	Evaluate constructive relationships and work effectively in the conception and delivery of a team project
3. Communication	Identify & apply professional communication and presentation skills	Demonstrate professional communication and presentation skills	Evaluate professional communication and presentation skills
4. Professionalism	Identify & apply self-management skills and set priorities for personal and professional progression	Demonstrate self-management skills and set priorities for personal and professional progression	Evaluate self-management skills and set priorities for personal and professional progression
5. Research	Identify & apply research, resources and methodologies that inform a project	Demonstrate the use of research, resources and methodologies that inform a project	Evaluate research, resources and methodologies that inform a project
6. Analysis	Identify & apply specialist information and practices	Demonstrate the ability to analyse specialist information and practices	Evaluate and analyse specialist information and practices and formulate reasoned arguments.
7. Innovation	Identify and apply problem solving techniques and test ideas in the realisation of a project	Demonstrate problem solving techniques, independent enquiry, practice and experimentation in the realisation of a project	Evaluate problem solving techniques, independent enquiry, practice and experimentation in the realisation of a project
8. Industry	Identify and apply industry vocabulary and knowledge to enable you to support your engagement with the commercial marketplace	Demonstrate industry vocabulary and knowledge to support your engagement with the commercial marketplace	Evaluate industry vocabulary and knowledge to enable you to present your work and support your engagement with the commercial marketplace
